Aashutosh Karwa

QA – Python Playwright | Agile Scrum
+91 9404945958 | ashuvkarwa@gmail.com | LinkedIN| Pune

Summary

I am results-driven SDET with over 5 years of experience including more than 2 years focused on QA automation across Web, Mobile, API, and Services platforms. I have strong knowledge of the Software Testing Life Cycle (STLC), test strategy design, test planning, execution, and managing defects to ensure high-quality software delivery. I am experienced in **functional, regression, exploratory, End to End, User Acceptance Testing UAT, SIT** and API testing with a strong focus on reviewing test results, collecting quality metrics, performing risk-based testing, and promoting continuous quality improvements. I have practical experience in Agile Scrum environments working closely with diverse teams such as designers, stakeholders, scrum master, business owners (BO) and developers to deliver key business features within tight deadlines. I am familiar with enterprise and cloud applications, including **Sales force CRM, EPC, CPQ, COM, CLM, CSG and Oracle Siebel** along with testing applications on Amazon AWS and Microsoft Azure. I was recognized for strong analytical skills, problem-solving abilities, and effective communication, which support efficient defect identification, triage, and resolution.

Work Experience

Senior Associate Consultant QA | Infosys

Dec 2023 - Present, Pune, India

- Designed and executed functional, integration, and regression test cases for backend services and enterprise applications**; supported SIT and UAT activities**
- Developed automation scripts using **Playwright and Python**, and using automation frameworks to simplify testing scenarios throughout the Software Testing Lifecycle in Agile methodologies, including post-release/post-implementation testing.
- Performed REST API testing using Postman — validated request/response structures, authentication, and JSON payload integrity.
- Performed prompt testing, hallucination detection, and response quality evaluation.
- Worked in partnership with development teams to deliver business functionality on time with required quality that meets acceptance criteria, participating in internal/cross-team meetings, project scoping, functional reviews, test specifications, and technical reviews in an Agile environment.
- Estimated and performed risk analysis to ensure quality delivery, enhancing project success through problem solving, analytical, and technical troubleshooting within testing teams.
- Managed a QA team in a Agile environment, facilitating training on QA best practices, tools to enhance team capabilities and streamline communication through weekly sync-ups for faster resolution of critical bugs.
- Mentored and delivered KT sessions to multiple testers; drove cross-training to improve team coverage and reduce single-point dependencies.
- Worked on demo presentations and sign-off from stakeholders for completed testing stories.

Quality Engineering Analyst / SDET | Accenture Solutions Pvt Ltd

May 2021 - Dec 2023, Remote, India

- Developed automation scripts using Playwright and Python, and using automation frameworks to simplify testing scenarios throughout the Software Testing Lifecycle in Agile methodologies, including post-release/post-implementation testing.
- Developed test strategies and test plans covering functional, regression, and integration test scopes.
- Designed & developed test plans, test cases, & test strategies by analyzing business requirements from clients, designers, & developers, executing test cases, ensuring efficient test execution through test data preparation.

- Worked with development teams & stakeholders in a Agile engineering team, participating actively in Sprint Planning, Sprint Review, Backlog calls, and retrospective calls to deliver business functionality on time with required quality.
- Captured quality assurance data and metrics using JIRA for defect tracking and reporting to meet release standards, performing risk analysis, and enhancing software performance in fast-paced, complex Agile environments.
- Contributed to a significant update of a consumer-facing app by handling complex releases over multiple release cycles, managing change across releases, and stakeholder management, resulting in increased user satisfaction and a reduction in project delays.
- Experience with continuous integration testing, while collaborating interactively with software engineers, testing engineers, and product managers from the beginning of the development cycle.
- Demonstrated strong organizational and problem-solving skills with great attention to detail, critical thinking, and solid communication to resolve issues and optimize processes

Education

Bachelor of Engineering (B.E.) in Electronics Engineering | Shri Ramdeobaba College of Engineering and Management

Aug 2017 - May 2021, Nagpur, India

Skills

- **Testing Expertise:** Functional Testing, Regression Testing, Sanity Testing, Black Box Testing, End-to-End Testing, Interactive Testing, GUI/UI Testing, iOS App Testing, Android Testing, API Testing, Integration Testing, Manual Testing, Salesforce Platform Testing Strategies, Software Testing Life cycle STLC
- **Tools and Web Services:** Playwright, Jira, Confluence, Fusion, Salesforce CRM, CPQ, CLM, CSG, EPC, COM, Siebel (Oracle), Postman, AWS, Azure, Jenkins (familiarity through CI/CD), Copilot, Postman
- **Programming and Frameworks:** Python
- **Other Technical and Soft Skills:** Agile Methodologies, Scrum Frameworks, Scrum/Agile, Test Case Creation, SDLC, Attention to Detail, Communication Skills (Presentational, Active Listening, Building Consensus), ProblemSolving, Critical Thinking, Analytical Skills, Team Collaboration, Adaptability, Stakeholder Management

Projects

Open Source OrangeHRM Testing Project | Tester

Mar 2023 - Mar 2024, Remote

- Developed a meticulous Test Plan and crafted detailed Test Scenarios for the open-source HRM web application, leading to thorough Test Report and Bug Report generation.
- Conducted rigorous Functional Testing, GUI Testing, Usability Testing, and Compatibility Testing, ensuring a seamless user experience and robust application performance in an Agile environment.

Certifications

AZ-900: Microsoft Azure Fundamentals | Microsoft | Aug 2025

Click here for Certificate Link

AI-900: Microsoft Azure AI Fundamentals | Microsoft | Jan 2026

Click here for Certificate Link

Web Services API Testing with Postman | Udemy
Gained theoretical and practical knowledge of API Testing using Postman.

Infosys Global Agile Developer Certification | Infosys
Completed the Certified Agile course to enhance Agile project management skills in SAFe Scrum environments.

Infosys Certified Selenium Advance Automation Tester | Infosys
Gained in-depth and practical knowledge of Automation Testing using Selenium for building automation frameworks

Achievements

- Reduced Production Bugs by 20%: With rigorous testing approach and meticulous defect documentation, led a 20% reduction in production bugs through end-to-end testing and risk analysis.
- Increased Test Coverage: Initiated an update to the existing testing suite that expanded coverage by 8-10% within a single quarter, leveraging automation to simplify scenarios.
- Contributed to total savings of £993475.50 for the client during 2024-2025 quarter.

Awards

Accenture Success Catalyst Award | Accenture Solutions Pvt Ltd
Awarded for collaborating with clients, communities, and ecosystem to deliver exceptional value in Agile projects.

Spot Recognition Award | Accenture Solutions Pvt Ltd
Recognized by Domain delivery manager and client for detecting major and critical bugs in software

Certificate of Appreciation | Infosys
Given by Infosys and Client in recognition for a record of outstanding accomplishments
